EXPERIENCE

Service WebOps Developer for Power Platform — Accenture

October 2023 – Ongoing

- I designed and created a PowerApps application which simplifies the management of inventories and stocks.
- I created Power Platform solutions which optimize processes whose life cycles require the use of approval flows and role distinction between end users.
- I developed RPA Automations to speed up repetitive and frequent procedures

Tools involved: PowerApps, Power Automate, Sharepoint, Power Automate Desktop, Power BI.

Power Platform Consultant — Algeiba SA

September 2019 - March 2023

- I developed a PowerApps application that streamlined a transportation company's vehicle check-in and check-out process.
- I created a PowerApps solution that enabled a client to efficiently and quickly manage employees' return to the office after the pandemic.
- I collaborated in building a Power Platform solution that improved the client's systems for recording and controlling invoices, vendors, and purchase orders.

Tools involved: PowerApps, Power Automate, Sharepoint, Power BI, Dataverse, Power Pages.
